PERSONAL PROJECTS

Poultry Dost - An App for Poultry Farms| *Flutter, Dart, Firebase, Android*   Mar. 2024
- Developed and presented POULTRY DOST, a groundbreaking mobile application designed to revolutionize Poultry and Goat Farm Management.
- We address the challenges faced by Farm Managers, providing a comprehensive solution for cost modeling, consumption tracking, production management, and day-to-day operations.

nextClass - Personalised Timetable App| *Flutter, Dart, Firebase, Android, Swift*   Aug. 2023
- Developed an Android App that helps students know their Next Class according to IIIT Sricity's timetable.
- Enabled users to view their Daily Class Schedule, search for subjects, and save their preferences for easy access.
- With over 500+ Downloads on PlayStore

Learnen - eLearning Platform using MERN| *React, MongoDB, NodeJS, Express, Javascript*   May. 2023
- With Learnen, skilled and experienced teachers can make a learning room for students and post various assignments and resources.
- Enabled teachers to curate assignments and share resources, fostering an interactive and educational experience for students.
- Developed the project as a part of Full Stack Development Course.

LetsChat - Simple Messaging App| *Flutter, Java, OOP, Firebase, Kotlin*   Dec. 2022
- A Messaging app offering a streamlined group chat interface for communication
- Developed a user-friendly platform with a single group chat, enabling users to send and receive messages in real time.
- Created the App as a part of Object Oriented Programming Course.

EXPERIENCE

App-a-thon — iLabs Hyderabad | *Team Lead*   March 2024
Successfully led the PlayStore team through the Technorathri App-a-thon, securing a position in the highly competitive event focused on Poultry Farm Agriculture.

Lyft Back-End Virtual Experience Program | *Developer*   July. 2023
Involved in the BackEnd Engineering of Lyft, a Transportation-as-a-Service Company
